

Developed over 40 years of experience and technological advancement, CLIMATIZER PLUS cellulose insulation is manufactured from a minimum of 85% locally-sourced post-consumer recycled newsprint.

Non-toxic additives are applied to the uniquely fiberized paper generating a building material with superior thermal and acoustic properties, as well as exceptional resistance to fire, moisture, mold and pests.

Certified by UL's ECOLOGO program, CLIMATIZER PLUS insulation is the environmentally safe and sustainable way to reduce energy consumption in residential and commercial building projects and to efficiently maintain comfortable climate in four season environments.

**This product is manufactured proudly in Canada and available for regional, national and international shipping.**

## **MANUFACTURER OF ENVIRONMENTALLY RESPONSIBLE CELLULOSE INSULATION AND OTHER SPECIALTY FIBRE SOLUTIONS**

**Please contact us with  
your queries.**

**We have information and  
solutions for you.**

## **CLIMATIZER INSULATION**

**THERMAL AND ACOUSTICAL  
CELLULOSE INSULATION**  
FOR INTERIOR WALLS | EXTERIOR WALLS  
ATTICS | CEILINGS | FLOORS

## BENEFITS

### ✓ High performing insulation product

Including High thermal resistance (R-value) of 3.59 per inch and exceptional acoustic (sound dampening) properties

### ✓ Meets or exceeds Provincial and Federal standards

Including Canadian Construction Material Council (CCMC) and Health Canada's Canada Consumer Public Safety Act

### ✓ Promotes energy conservation

And reduction of energy related spending across a wide range of climactic conditions, reducing our overall national carbon footprint

### ✓ Offers high resistance to the spreading and damage caused by fire

Improving fire safety in homes and buildings

### ✓ Highly resistant to moisture related problems

Like mold and mildew

### ✓ Ideal for use in Green Building projects

LEED certification, and other environmentally sustainable building practices

## ENVIRONMENTALLY RESPONSIBLE AND ENVIRONMENTALLY SAFE

Made from recycled materials

Uses NO pollutants during manufacturing

No known associated health risks for humans and pets

Climatizer Plus has been extensively researched and field tested and meets standards for National Research Council (NRC), Canadian Construction Materials Centre (CCMC Evaluation Listing Report No. 09217-L), and the Canada Consumer Product Safety Act (SOR/2016-177)
